

eCANDLE128

Overview:

Electronic votive stand, mobile and versatile, that have been gaining ground against the traditional candles especially because: they do not emit smoke, thereby avoiding deteriorations in figures and altarpieces, are not called thereby avoiding a possible accident, do not stain with the wax, give off no odors, in addition to having the latest technology in energy efficiency by using LED technology candles/lights with an almost unlimited lifetime and an electric consumption 40% lower than that of a conventional light bulb.

With 128 LED candles/lights of high luminance and energy efficiency, this votive stand has a microprocessor that manages and allows setting the duration time of the lighting candles and the price on each candle (comes with a factory preset). Additionally it has a deposit box iron for coins with locking key.

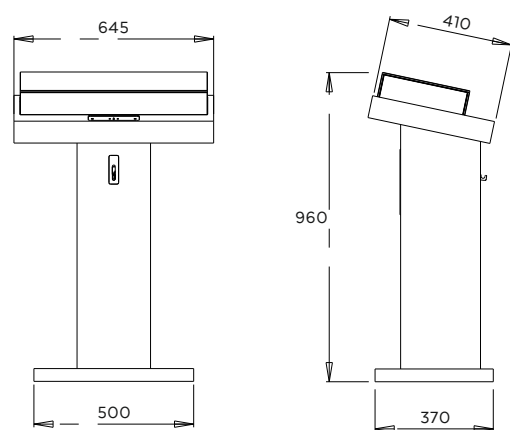

Made of wood with varnished finish, this votive stand can be supplied with different finishing (upon request) and with an optional "kit" that includes electronic + LCD display giving information about the total amount accumulated.

Specifications:

- ♦ Electronic votive stand
- ♦ 128 LED technology candles
- ♦ Internal microprocessor to manage functions
- ♦ Duration time and price of each candle-lighting
- ♦ Coin acceptor for 6 coins (prepared for different currencies)
- ♦ Way-out for rejected coins
- ♦ Tempered glass cover, 8mm
- ♦ Steel safe with locking key
- ♦ 85-264V AC mains voltage
- ♦ Wood construction (different finishing available)
- ♦ Internal LCD display kit for additional info (optional)
